What do you want your system to do for you?

✓ Smart System Wish List

Researching a new system, or assessing your current system and thinking about a change?

Look through the following list. Make a wish-list from the features you'd like to see in your new system. All of the following are available and can be chosen to customize a solution that fits you, your family, and your lifestyle.

- ☐ Sound an alarm and transmit alert when a door or window is breached when system is armed
- ☐ Be monitored 24/7/365 to contact for verification of system alarm
- ☐ Monitoring staff to contact emergency response 24/7/365 when needed
- ☐ Connect to monitoring station through cellular service, so a land line phone is not needed
- ☐ Provide 2-way communication through the control panel
- ☐ Provide panic button in mobile app
- ☐ Provide quick alarm cancel through mobile app
- ☐ Provide a panic button or emergency button pendant
- ☐ Provide audible weather alerts triggered by zip code of property
- ☐ Be voice controlled through Amazon Echo or Google Assistant

- ☐ Work even when electricity is out
- ☐ Work without dependence on internet connection (dedicated communication)
- ☐ Work even when the system has been disabled or control panel destroyed
- ☐ Alert and notify different sensor responses, locks, and system arm/disarm with customized settings
- ☐ Self-manage access and codes for multiple users
- ☐ Customize access codes by day and time preferences
- ☐ Use geo tracking through smart phones to notify/alert and/or change status

- ☐ Detect, alarm, and alert the presence of freezing temperatures, high heat or smoke
- ☐ Detect, alarm, and alert the presence of carbon monoxide
- ☐ Detect, alert, and notify when an attached sensor indicates a stove or grill has been left on
- ☐ Detect, alert, and notify when an attached gun lock indicates it has been physically moved
- ☐ Detect, alert, and notify the presence of water in an area prone to flooding or when sump pump stops
- ☐ Automatically turn off water valve when flooding detected

- ☐ Provide remote access (web portal or mobile app) to a dashboard of activity and history of sensor responses and system activity
- ☐ Provide remote access (web portal or mobile app) to door locks
- ☐ Provide user interface to set up permanent and customizable temporary access door codes
- ☐ Provide notifications when/if door codes are used
- ☐ Open/close garage door through system while on site
- ☐ Provide remote access (web portal or mobile app) to garage door opener
- ☐ Provide remote access (web portal or mobile app) to chosen small appliances, compatible controllers, lights, and thermostat

- ☐ Video surveillance of inside and/or outside of building day and night
- ☐ Provide remote access (web portal or mobile app) to view video anytime
- ☐ Record video footage for access later
- ☐ Provide video analytics and customized settings
- ☐ Capture a "snap shot" image from inside the building due to motion sensor activity

- ☐ Provide remote access "snap shot" image from inside the building on demand
- ☐ Provide doorstep monitoring with doorbell camera and intercom
- ☐ View surveillance video on your TV through Amazon Fire Stick

- ☐ Automate chosen small appliances, compatible controllers, lights, and thermostat by customized schedule
- ☐ Automate chosen small appliances, compatible controllers, lights, and thermostat by sunset/sunrise triggers
- ☐ Automate chosen small appliances, compatible controllers, lights, and thermostat triggered by another action (such as arm/disarm, door opened, etc.)
- ☐ Automate chosen small appliances, compatible controllers, lights, and thermostat differently for a vacation
- ☐ Automate thermostat with temperature thresholds
- ☐ Automatically adjust thermostat in response to open doors and/or windows
- ☐ Integrate with outdoor irrigation system for smarter control
- ☐ Use geo tracking through smart phones to trigger automatic actions of small appliances, compatible controllers, lights, and/or thermostat

- ☐ Provide unique sensors to monitor behavior patterns in order to allow a loved one with special needs to be home alone
- ☐ Enable the history of these sensors to facilitate healthcare provider oversight
- ☐ Alert/notify unusual activity for immediate assessment and response

- ☐ Provide automatic software updates for control panel
- ☐ Provide for client approved off-site tech support through back-end access as needed to address issues faster
- ☐ Provide professional installation with initial programming, set-up, training, and continued tech support
